

Managing Diabetes Workshops

Alberta Healthy Living Program

Managing Diabetes 3 Part Education

There are 3 options to help you maintain good control and prevent diabetes-related problems.

Diabetes Overview: A Registered Nurse will answer the questions; “What is Diabetes?” and “What does good control mean?”

Nutrition for Diabetes: A Registered Dietician will teach you how to choose healthy food to better manage diabetes.

Living with Diabetes: A Registered Nurse explores living with diabetes and how diabetes changes over time.

Living with Diabetes: Seated Exercise and Foot Care

Exercise helps to manage blood sugar levels, improve your overall health and boost mood while reducing stress.

Diabetes can impact your nerves and blood vessels as well as your ability to heal, so your feet need extra care and attention.

Fortunately, exercise can be done from a chair and receive the same great benefits!

- **30 minutes learning how and why footcare is important**
- **30 minutes learning ways to get moving from your chair**

Diabetes Overview with Registered Nurse
